

Snowshoe Tour Gear Checklist

Presented by Utah Outdoor Adventures

You won't need a lot of gear for your snowshoe tour, we provide most of the gear. You'll just need basic winter clothing and few extra items for comfort:

Please Bring:

- Footwear:** A good waterproof snowboot like a Sorel is ideal. Please make sure it is a rubber based boot. You don't want to use a nice boot made for looks and going out on the town. Make sure it is made of durable, waterproof material. Boots can potentially rip or be damaged on the tour. UOA is not responsible for poor gear choices made at the behest of clients.
- Jacket:** Waterproof ski jacket or similar, breathable fabrics are best.
- Ski Pants:** Waterproof ski pants or similar, breathable fabrics are best.
- Base Layers:** Basic long underwear tops and bottoms.
- Insulated Layer:** A midweight layer like a sweater or similar that you can shed if it gets warm.
- Gloves:** Waterproof ski gloves.
- Sunglasses:** No Goggles (they fog and will be too warm) Good UV protection sunglasses are best, snow is very bright and reflects a lot of light.
- Sunscreen:** Both for direct sun protection and reflection.
- Miscellaneous:** Tissues, lip balm and other personal items if needed.

We Provide:

- NEOS**
- Water**
- Snacks**
- Snowshoes**
- Trekking Poles**
